

## Try catch block Example

```
package test.com;
import java.util.*;
public class Read_input {
    public static void main (String Args[]) {
        int[] a = new int[5];
        try {
            for(int i=0;i<Args.length;i++) {
                a[i]= Integer.parseInt(Args[i]);
                System.out.println(a[i]+" ");
            }
        } catch(Exception e) {
            System.out.println(e);
        }
        finally {
            System.out.println("Sucess");
        }
    }
}
```

o/p:

Success
