Check the given String Palindrome or not Program

```java
package test.com;
import java.util.*;
public class Palindrome {

    public static boolean isPalindrome(String str) {
        String str1 = " ";
        boolean ans = false;
        for(int i = str.length()-1;i>=0;i--) {
            str1 = str1 + str.charAt(i);
        }
        if(str.equals(str1)) {
            ans=true;
        }
        return(boolean) ans;
    }

    public static void main(String[] args) {
        String str = "amma";
        boolean A = isPalindrome(str);
        System.out.println(A);

        // TODO Auto-generated method stub

    }

}
```

o/p:

false
